

Coordination and support actions H2020

Project Number: GA - 101016216

Project Acronym: unCoVer

Project title: Unravelling data for rapid evidence-based response to COVID-19

Deliverable 5.2

Website

Document Properties

Deliverable No.	5.2
Deliverable Title	Website
Lead beneficiary	UP
Due date of deliverable	14/03/2021
Actual submission date	19/03/2021
Dissemination level	PU

Dissemination Level

PU = Public
PP = Restricted to other programme participants (including the Commission Services)
RE = Restricted to a group specified by the consortium (including the Commission Services)
CO = Confidential, only for member of the consortium (including the Commission Services)

WP	Work Package
WPL	Work Package Leader

EXECUTIVE SUMMARY

In agreement with unCoVer's Dissemination and Exploitation Plan (D5.1), the team strives so that results and outputs can be widely disseminated to the designated and appropriate target groups identified. To this end, appropriate communication channels and tools are necessary.

One of the most impactful strategies for communication is *via* the project's dedicated website.

This deliverable deals with the creation, organization and curation of the unCoVer website.

1. INTRODUCTION

1.1. Objectives, scope and content of the Deliverable

This deliverable marks the creation of the unCoVer website. It will focus the process used for creating the website, its most relevant traits and the process by which the website will be maintained and updated throughout the duration of the project.

2. UNCOVER WEBSITE

2.1 Domain and hosting characteristics

The domain of the projects website is www.uncover-eu.net, as decided in the project's General Assembly (GA).

It is currently hosted at a Portuguese hosting company (www.dominios.pt) with the following specifications:

- 15GB SSD
- 2 sub-domains
- 3 databases
- HTTPS security
- 1vCPU / 1GB RAM
- IOPS 10MB/s

The website was built based in the Content Management System WordPress and the domain has been secured for 2 years.

2.2. Website visual identity

The unCoVer website follows the visual identity already presented in D5.1 – Dissemination and Exploitation Plan, namely font, color schemes and logos (Figure 1).

2.3. Website organization

The website is built as a one-pager dynamic website, in which most contents can be access from the home page. However, the user may also navigate to dedicated pages.

The sections currently available in the home page can be seen in Figure 1.

Figure 1 - Homepage of the unCoVer website

Mission: This section presents the specific aims that are to be achieved by unCoVer. It will also include the composition of all committees and substructures in the unCoVer project.

Events: A calendar-like page where users may find past and future events of the network, including lectures, seminars, workshops, meetings, among others.

News: The “News” section compiles all the news and posts that are published in the website. While the homepage only lists the 3 most recent news, the “News” page compiles all past and present news.

Partners: This page is an extensive list of all the partners that are part of the unCoVer network (Figure 2). Every time the page is loaded, the order of appearance is arbitrary, so that different partners are shown. For each partner, a dedicated “identity card” is presented, comprising information regarding the country of origin, contact person, partner logo and institutional website (Figure 3).

Resources: The Resources page will in the future host all public documents to be shared by the network. This includes not only all public deliverables, but also newsletters, job offers or other content produced by the network.

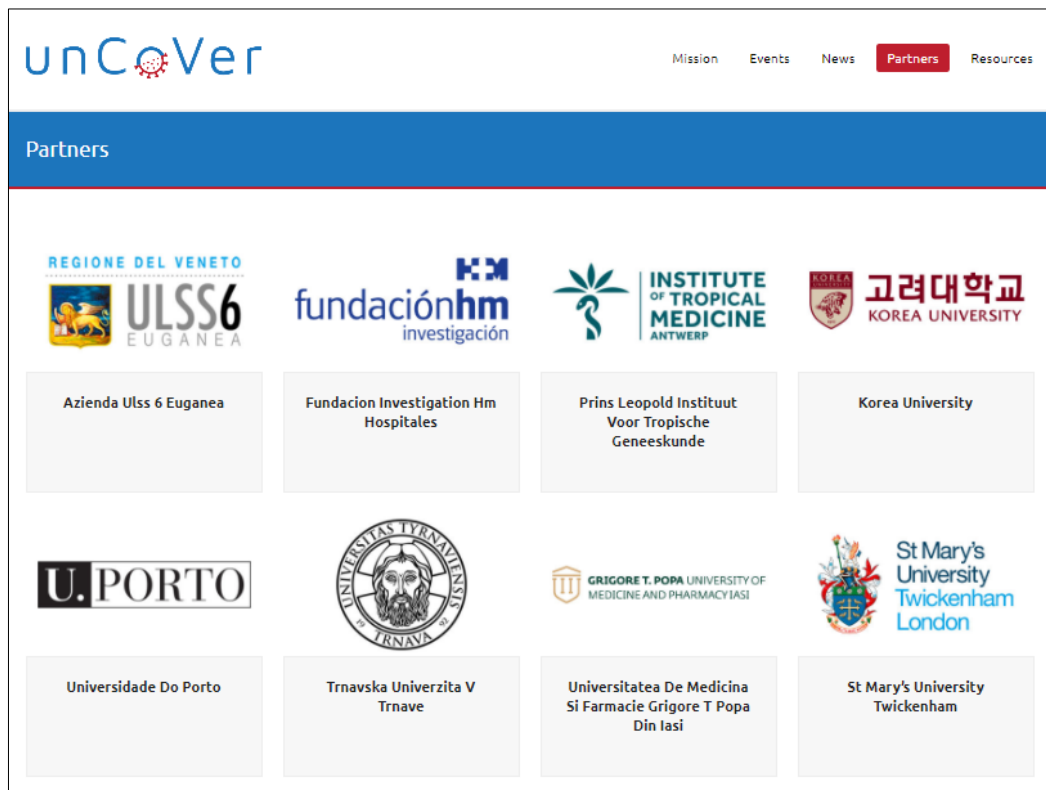

Figure 2 - Listing of all consortium partners

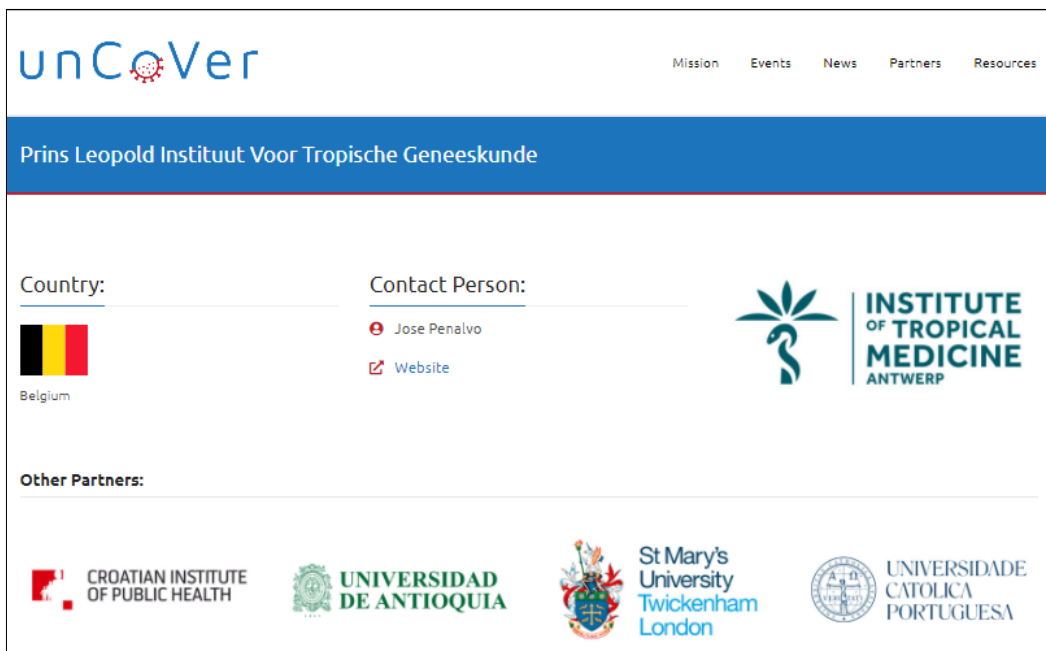

Figure 3 - Information presented for each partner

In the future, when more results are available from other Work Packages (WP), a new section will be created, tentatively “COVID-19 data”. This new section will feature a web app with interactive data to be accessible to all users, including sorting by geography, age, gender, among others.

Other sections of the website include the footer (Figure 4), where users can find the dedicated email address to contact the network, the European Commission (EC) logo and acknowledgment with a hyperlink and the addresses/handles for the network’s social media

Figure 4 - Website footer

2.4. Procedure for updating website contents

The website content will be managed and updated by WP5 Leader (UP), using the materials approved by the Exploitation and Dissemination Committee. For simpler contents, such as news posts, the approval will come from WP5 Leader.

Future sections to be included, such as the above-mentioned web app, will be implemented after approval by the GA.

3. CONCLUSION

This document presents the unCoVer website. As a pivotal tool for implementing the network’s Communication and Dissemination strategy, the website will be continuously updated and cited in all activities organized by the project.

We intend the website to be a central asset for the project and bring users to interact with it in a frequent basis, thus maximizing exposure and reach.

This project is funded by the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement No 101016216.
